

Angiology and Vascular Surgery

Angiology & Vascular Surgery

Quirónsalud Marbella Hospital has a team of specialists in Angiology and Vascular Surgery, supported by a nursing team with large experience and knowledge in the diagnosis and treatment of vascular diseases and their potential complications. This healthcare multidisciplinary approach helps us offer premium quality medical assistance to our patients.

The Angiology and Vascular Surgery Unit stands out for the implementation and development of technologically-advanced techniques in the comprehensive treatment of artery and venous diseases, with special interest in minimally-invasive endovascular treatments, not only to solve varicose vein issues, but also aneurysm and obstructive artery disease.

Our healthcare professionals deal with the prophylaxis, diagnosis and treatment of vascular diseases such as artery, venous and lymphatic disease. Each patient is taken through a process of individualised rapid and coordinated assessment.

Diseases, treatments, techniques and multidisciplinary units:

- Artery disease: endovascular or surgical treatment of aneurysm or supra-aortic trunks occlusive disease; visceral, renal, aortic and limb arteries.
- Venous disease: haemodynamic surgery and sclerotherapy of varicose veins. Treatment of venous thromboembolism.
- Lymphatic disease: diagnosis and treatment.
- Artery-vein malformation: diagnosis and treatment.
- Our hospital is a reference in the salvage of limbs (diabetic foot and critical limb ischaemia).

Dr Gallardo Pedrajas

Head of the Angiology and
Vascular Disease Unit

Languages:

Spanish, English.

Dr Gallardo Pedrajas is a reputed specialist in Angiology and Vascular Disease with an outstanding international background and recognition for the treatment of aneurysm, thrombosis, varicose veins, diabetic foot, stroke, non-surgical treatment of varicose veins, peripheral arterial disease and other diseases of the vascular system.

His extensive training includes qualifications that award him the specialisation in endovascular techniques relating to angiology, such as the certification to manage vascular laboratories and X-ray facilities with medical purposes granted by the Medical Physics Spanish Association, as well as numerous training positions in national and international medical centres and hospitals in France, the UK and the USA.

Dr Gallardo Pedrajas combines his medical practice with his teaching position as an Assistant in the Surgery Studies of the Malaga University and the European Society of Vascular Surgery (ESVS). He is also very active as a scientific researcher and proponent, with numerous research papers and projects being published in scientific journals of international reputation, and has been involved in more than 100 medical lectures and communications within his specialisation.
